Java Full Stack Developer (React.js + Spring Boot) | 2.4+ Years of Experience

PROFESSIONAL SUMMARY

Java Full Stack Developer with 2.4+ years of experience building scalable, high-performance web applications using React.js, Spring Boot, and REST APIs. Improved application performance (35%) and reduced API latency (25%) through optimized architecture and Redux Toolkit. Experienced in developing secure, production-grade systems (JWT, RBAC) and delivering features that increased user engagement (40%). Strong foundation in Data Structures, Object-Oriented Programming (OOP), and Software Development Lifecycle (SDLC), with hands-on experience in Agile environments.

SKILLS

Backend Frameworks: Java, Spring Boot, Spring MVC, Spring Security, Spring WebFlux, Hibernate, RESTful APIs, Microservices Architecture, JWT Authentication

Frontend Technologies: React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, Cross-Browser Compatibility, Web Performance Optimization

Databases: MySQL, PostgreSQL, MongoDB, SQL Queries, Relational Database Design, Query Optimization

Tools & Version Control: Git, GitHub, Maven, Postman, JIRA, IntelliJ IDEA, VS Code

Testing: JUnit, Jest, Integration Testing, Unit Testing, API Testing

Core Concepts: Object-Oriented Programming (OOP), RBAC, Data Structures & Algorithms(DSA), Full Software Development Lifecycle(SDLC), Design Patterns, Debugging & profiling, Multithreading & Concurrency, API Gateway

Methodologies: Agile/Scrum

Additional: C, C++, understanding of system-level programming concepts, Code Review & Collaboration

EXPERIENCE

Software Engineer

Client: Capgemini | Payroll: MarkGenic Software Pvt Ltd

Apr 2024 – Present | Full-time

Backend Contributions

- Designed and developed **scalable backend services** using **Spring Boot**, improving system throughput by **25%**
- Built and optimized **REST APIs**, reducing **response time by 30%** and improving **data consistency**
- Implemented **secure authentication & authorization systems** (JWT, RBAC), enhancing system security by **40%**
- Designed and optimized **MySQL schemas** with **indexing** and **query tuning**, improving **performance by 25%**
- Developed **robust API integration layers** with **error handling & retry mechanisms**, improving reliability by **20%**

Frontend Contributions

- Developed **dynamic** and **reusable UI components** using React.js, improving **UI performance by 35%**
- Implemented **Redux Toolkit** for **efficient state management**, reducing **redundant API calls**
- Optimized frontend performance using **lazy loading**, **memorization & code splitting**, reduce **load time by 35%**
- Ensured **cross-browser compatibility** and **responsive design (Tailwind CSS)** for better user experience

General

- Applied **OOP** principles and **modular architecture** across **frontend and backend systems**
- Worked across the **full Software Development Lifecycle (SDLC)**
- Collaborated in **Agile/Scrum** teams with **cross-functional stakeholders**
- Focused on **performance optimization**, **scalability**, **maintainability**, and **high-availability systems**

PROJECTS

1. Hospital Management & Appointment System

Project Overview: Built a **scalable full-stack healthcare platform** using React.js and Spring Boot with **JWT-based role access (Admin/Doctor/Patient)**. Optimized REST APIs and workflows, improving **appointment processing efficiency by 40%**.

Roles & responsibilities:

Backend

- Developed **REST APIs** for patient, doctor, and appointment management using **Spring Boot**
- Implemented **secure authentication** and **role-based access control** (JWT, RBAC)
- Optimized backend performance using **SQL query tuning** and **efficient schema design**

Frontend

- Built **responsive UI** using **React.js** with **reusable components**
- Implemented **Redux Toolkit** for centralized state management
- Improved user workflows and reduced appointment processing time by **40%**

Outcome: Delivered a production-grade healthcare platform that Improved appointment processing efficiency by **40%**. Enhanced user experience with faster and smoother workflows. Reduced backend response delays through optimized APIs

Tech Stack React.js, JavaScript (ES6+), Redux, Tailwind CSS, HTML5, CSS3, Spring Boot, REST APIs, JWT, MySQL

2. Retail E-Commerce Management Platform

Project Overview: Developed a **high-performance e-commerce platform** using React.js and Spring Boot with **modular UI and optimized APIs**. Enhanced user experience, increasing **engagement by 40%** and reducing **page load time by 25%**.

Roles & responsibilities:

Backend

- Developed backend services for **product, cart, and order management**
- Designed **REST APIs** ensuring seamless frontend-backend communication
- Improved **API reliability** and **reduced system failures by 20%**

Frontend

- Built **modular and scalable UI components** using **React.js** and **Tailwind CSS**
- Implemented **product listing, filtering, and cart functionality**
- Optimized performance using **lazy loading** and **memoization, reducing load time by 25%**

Outcome: Launched a scalable e-commerce platform that improved user engagement by 40% and reduced page load time by 25%, driving faster and smoother purchase experiences.

Tech Stack: React.js, JavaScript (ES6+), Redux, Tailwind CSS, HTML5, CSS3, Spring Boot, REST APIs, JWT, MySQL

EDUCATION

Bachelor's of Engineering (Mech) - K. K. Wagh College of Engineering, Nashik | SPPU | 2023 | CGPA – 7.41

HSC – Maharashtra State Board | 2019

SSC – Maharashtra State Board | 2017

CERTIFICATIONS

Full Stack Java Developer — Seven Mentor Training Institute, Pune

ACHIEVEMENTS

- Recognized as **Top Performer** in team
- Participated in **hackathons and coding competitions**
- Delivered multiple features **ahead of sprint deadlines**
- Completed certifications in **Java Full Stack Development**

HOBBIES & INTERESTS

Exploring new technologies, Problem solving, Reading tech blogs, staying updated with new frameworks, Reading
